

***World Environment Day (WED)** is the United Nations' principal vehicle for encouraging worldwide awareness and action for the environment. Over the years it has grown to be a broad, global platform for public outreach that is widely celebrated by stakeholders in over 100 countries. It also serves as the 'people's day' for doing something positive for the environment, galvanizing individual actions into a collective power that generates an exponential positive impact on the planet. ***World Ocean Day (WOD)** is the United Nations' principal vehicle for encouraging worldwide awareness and action for the protection and conservation of our oceans for future generations. It is an opportunity to raise awareness of the current challenges faced by the international community in connection with the oceans and celebrating this day allows us to change perspective (encourage people to think what oceans mean to them and what it has to offer them and how can it offer the same benefits for their grandchildren. It also allows us to learn more about how our daily actions affect oceans, how all living beings are interconnected, and we can change our own ways of thinking and acting. And most certainly we can celebrate the successes we have had towards protecting the waters by making small modifications ourselves, write a declaration together about it during the conference and plan to participate in activities that would improve the condition of oceans. Please read more from: <http://worldoceansday.org/>

* The Baltic Sea Project's 9th International Conference titled „Science of Changes“ will be held on 5-8th of June in 2015 at the **Pirita TOP SPA Hotel**. Find the location here: <http://www.tallinkhotels.com/pirita-top-spa-hotell>

Estonia's largest spa – Pirita Spa Hotel – is known for its Olympic history. It provides a wide selection of health, beauty and wellness services and packages. The hotel is located a 10-minute drive from the heart of the city, right on the beautiful seashore.

The hotel, which resembles with its construction that of the catamaran, was erected for the Sailing regatta of the Olympic Games 1980, and due to its unique unfinished concrete construction and plenty of design elements it remains under the protection of the National Heritage Board as an architectural treasure.

Hotel is awarded with the special prize on the biennale of the International Union of Architects (UIA) in 1983.

The hotel was completed in 1979, for the pre-Olympics and the first visitors arrived for the Baltic Regatta the same year. The hotel is one part of the Tallinn Olympic yachting center, established for the yachting regatta of the 1980 Olympics, held in Tallinn. This regatta was an event of historical importance – Tallinn and Estonia entered the world's sports map.
